FITFLOOR™

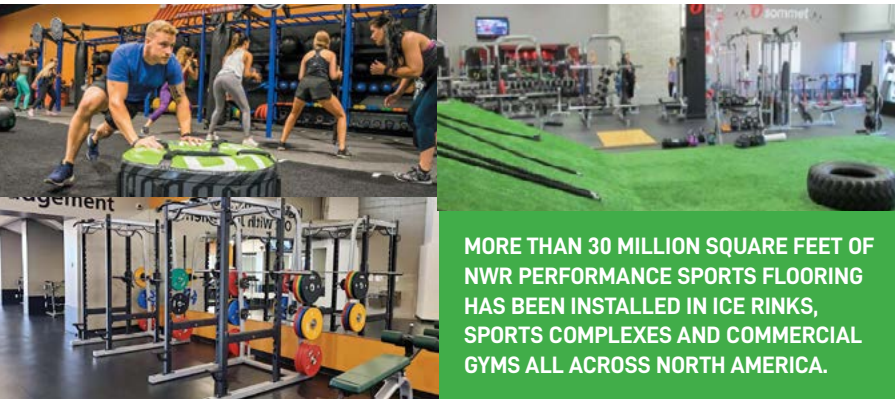

**UPGRADE TO
COMMERCIAL
QUALITY HOME GYM
RUBBER FLOORING**

NWR IS A LEADING NORTH AMERICAN MANUFACTURER OF COMMERCIAL SPORTS FLOORING.

Since 1968, NWR has been a leading North American manufacturer of innovative rubber products.

For **over 25 years**, our high performance sports flooring has been used in the **weight rooms and training facilities** of professional sports teams and premiere college and university campuses across all of North America.

We have transformed **over a billion pounds of end-of-life tires into useful**, high-quality **recycled rubber products**.

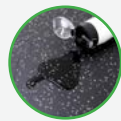

MORE THAN 30 MILLION SQUARE FEET OF NWR PERFORMANCE SPORTS FLOORING HAS BEEN INSTALLED IN ICE RINKS, SPORTS COMPLEXES AND COMMERCIAL GYMS ALL ACROSS NORTH AMERICA.

WHAT IS VULCANIZATION?

NWR takes recycled crumb rubber from end-of-life tires and fuses it together under extreme heat and pressure to form a solid, non-porous rubber mass – a process similar to how a diamond is naturally formed under extreme pressure and heat.

THE RESULT?

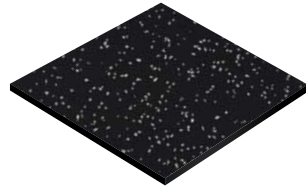

This vulcanization process creates a hygienic, non-porous surface which repels moisture and bacteria collection. It also creates an ultra-dense, longer lasting finished product, with up to 20% more rubber than polyurethane-bound crumb rubber products.

1 FITFLOOR™ 4x6 MAT USES CRUMB RUBBER FROM 5 END OF LIFE RECYCLED TIRES.

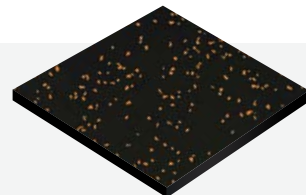

FITFLOOR™

COMMERCIAL QUALITY RUBBER HOME GYM FLOORING

8mm (5/16") FITFLOOR™

Professional-grade performance rubber flooring of choice with tried and trusted floor protection, antimicrobial hygiene and outstanding durability.

10mm (3/8") FITFLOOR™ PRO

Commercial-grade athletic rubber gym flooring engineered to withstand the demands of your high-impact workout and weight training regimen.

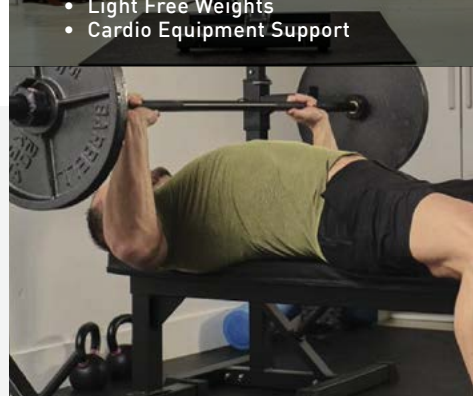

12mm (1/2") FITFLOOR™ MAX

The athlete's choice of heavyweight flooring, specifically engineered for extreme impacts and heavy weight loads.

- Aerobics and Zumba
- Light Free Weights
- Cardio Equipment Support

- High Impact Aerobics
- Medium to Heavy Free Weights
- Plyometrics / Box Jumps
- Strength Equipment Support

- Very Heavy Free Weights
- Extreme Plyometrics
- Deadlifting
- CrossFit

FitFloor™ Max is Exclusive to Specialty Fitness Retailers

FITFLOOR™ CONTAINS 20% MORE RECYCLED RUBBER THAN STANDARD POLYURETHANE-BOUND RUBBER PRODUCTS.

PROTECTION

Engineered to protect your floor and your joints. FitFloor's vulcanized recycled rubber construction contains up to 20% more rubber than polyurethane recycled rubber flooring. This gives FitFloor™ its superior density and shock absorption allowing it to better protect your floors from the rigors of your workout, while providing optimal cushioning and energy return to protect your joints.

99.5% MICROBIAL ELIMINATION
SMOOTH, NON-POROUS SURFACE RESISTS SWEAT AND BACTERIA ABSORPTION.

Independent study conducted by Westech Systems FM Inc.

ANTI-MICROBIAL & HYGIENIC

FitFloor™ absorbs up to 20 times less moisture than polyurethane recycled rubber flooring alternatives because there are no pores for moisture to seep into and most importantly no way for bacteria to enter. This poreless surface prevents bad odours from forming and defends against the build-up of bacteria. Liquids simply remain on the surface to be wiped off with a damp mop.

OVER 30 MILLION SQUARE FEET OF NWR PERFORMANCE RUBBER FLOORING HAS BEEN INSTALLED IN COMMERCIAL ATHLETIC FACILITIES AND ICE RINKS.

DURABILITY

Used in sports complexes, professional training facilities, ice rinks and commercial gyms for over 25 years, FitFloor™ vulcanized recycled rubber flooring has been engineered for the demands of these high traffic facilities. Its ability to withstand skate blades, cleated shoes and extreme free weight drop protection, combined with over 30 million square feet of installed flooring in commercial facilities proves FitFloor is engineered to last.
